INTRODUCTION

This research poster presents findings on the developmental challenges of Muhammadiyah educational charitable businesses in Depok City. The study seeks to address the question: What are the factors impacting the growth of Muhammadiyah educational institutions in regions with weak organizational infrastructure? This inquiry contributes to the existing literature by highlighting the link between organizational dynamics and educational development within Muhammadiyah.

OBJECTIVE

The primary objective of this research is to identify the key issues hindering the development of Muhammadiyah educational charities in Depok City and to propose strategies for overcoming these challenges.

METHODOLOGY

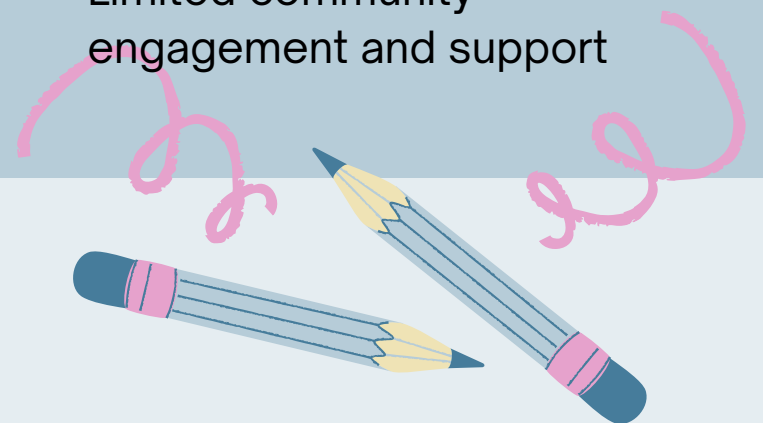

This research employs a descriptive qualitative approach with a case study focus in the Sukmajaya and Cimanggis sub-districts. Methods include:

- Interviews with local Muhammadiyah leaders
- Surveys of community members
- Comparative analysis of successful and struggling Muhammadiyah educational institutions

RESULTS

The study identified several challenges impacting the growth of Muhammadiyah educational charities:

- Weak organizational structure
- Insufficient funding and resources
- Limited community engagement and support

ANALYSIS

Data analysis reveals that successful growth is correlated with strong leadership and community involvement. Key visual aids include:

- Graphs showing funding allocation and growth rates
- Tables outlining community engagement levels
